Lapwai, Idaho 83540-0365

Dear Ms. Powaukee:

NOMINEE FOR COLUMBIA RIVER COMPREHENSIVE IMPACT ASSESSMENT (CRCIA) PEER REVIEWER

Per the Hanford Federal Facility Agreement and Consent Order (Tri-Party Agreement) the purpose of the CRCIA is to estimate the current human health and ecological risks from emissions of Hanford operations to the river. Further, the Tri-Party Agreement requires that these estimates undergo technical peer review. The technical peer review process is being managed by the Directors of the State of Washington Water Research Center and the State of Oregon Water Resources Research Institute. The Directors have selected nine technical peer reviewers from the nominees that were solicited from all interested parties. Recently the Tri-Parties accepted all but one of the selections.

In reference to your letter to Mr. K. Michael Thompson "Confederated Tribes of the Umatilla Indian Reservation Nominee for Columbia River Assessment Blue-Ribbon Technical Review Group," dated May 17, 1995, you provided a nominee as a technical peer reviewer for the CRCIA. The U.S. Department of Energy, Richland Operations Office, is pleased to report that the Tri-Parties have accepted your nominee, Dr. Barbara L. Harper, as a technical peer reviewer.

Should you have any further questions concerning this matter, please contact Mr. Randy Brich at (509) 376-9031.

Sincerely,

Julie K. Erickson, Director
River Sites Restoration Division
